

U.S. Bank

FX Detailed

SSI Instructions

Introduction

The purpose of this guide is to provide detailed instructions for sending payments to U.S. Bank FX for all our receivable currencies. The information listed within should be used as a guide and presented to your sending bank for proper formatting. Payment information in this guide is formatted according to the individual currency in a SWIFT standard MT202 message. Payments made to U.S. Bank Foreign Currency accounts and Direct Deposit accounts are listed in standard MT103 formatting. U.S. Bank clients should ensure they have the most recent version of this guide by utilizing the [U.S. Bank Foreign Exchange customer resource page](#). Our FX Customer Resource page also holds our consolidated SSI sheet for quick reference instructions entitled “Standard Settlement Instructions”.

Each sending bank has its own requirements and processes for sending FX payments. Please reach out to the initiating bank for further and/or differing delivery guidance.

U.S. Bank Foreign Exchange Contacts

Please contact U.S. Bank Foreign Exchange with any questions regarding currency, instruction, delivery requirements, or other FX questions.

Key Terms

SWIFT/BIC CODE

SWIFT codes (or SWIFT-BIC, BIC code, SWIFT ID) are the standard format of Bank Identifier Codes approved by the International Organization for Standardization (ISO). It is the unique identification code of a particular bank. These codes are used when transferring money between banks, particularly for international wire transfers.

The **SWIFT** code is 8 or 11 characters, made up of:

- **4 characters** - bank code (only letters)
- **2 characters** - ISO 3166-1 alpha-2 country code (only letters)
- **2 characters** - location code (letters and digits) (if the second character is '1', then it denotes a passive participant in the SWIFT network)
- **3 characters** - branch code, ('XXX' for primary office) (letters and digits). Where an 8-digit code is given, it may be assumed that it refers to the primary office

IBAN/INTERNATIONAL BANK ACCOUNT NUMBER

The International Bank Account Number (IBAN) is an international standard for identifying bank accounts across national borders.

The IBAN imposes a flexible but regular format for account identification and contains validation information to avoid errors of transcription.

The IBAN's primary purpose is to facilitate cross-border inter-bank routing and avoid routing errors.

The IBAN consists of a 2-digit country code, followed by two check digits and up to thirty alphanumeric characters for the domestic bank account number, called the BBAN (Basic Bank Account Number). IBANs are required for some currencies when sending MT103 messages. MT202 messages do not usually require IBANs, as banks do not typically hold traditional accounts with their correspondent banks. The instructions contained in this guide reflect that policy.

Disclosures

The information in this guide is subject to change without notice. U.S. Bank makes no representations or warranties as to the accuracy, completeness, or timeliness of the information in this form. The availability of the currencies listed herein are subject to change without notice.

Payments may be subject to return or delay due to sanctions screening or additional requirements/requests from downstream banks. Incomplete instructions may cause delay or rejection. In these instances, U.S. Bank reserves the right to request additional information.

Any change to your standing instructions must be communicated to U.S. Bank Foreign Exchange Operations no less than three business days prior to settlement. Failure to do so may result in settlement after value date and a claim for compensation or use of the previously applicable settlement instructions and a claim for compensation.

Individual country currency holidays are subject to change, booked trade value dates may be amended as a result.

FCA/DDA GENERAL INSTRUCTIONS

Please utilize the following message format when wiring funds to credit your U.S. Bank account. These instructions are only an example of formatting. Your FCA or DDA information should be inserted into the appropriate beneficiary fields. For inquiries, or to request instructions in an official letter, please reach out to FXClientServices@usbank.com

Incoming funds **must** be received via MT103.

SEPA payments are not permitted.
